SUMMARY

Full-stack web developer who is passionate about delivering solid user-experiences and working with others. Obtained an Associate of Science for Computer Science, and then decided to pursue web development and obtained a University of Oregon full-stack web developer bootcamp certificate. Strengthened ability as a communicator and a problem solver through two years of work experience as a delivery driver and frequently working with others on projects.

PROJECTS

Beet Hub | *https://github.com/heatherviolet/beat-hub* **|** *https://blooming-tundra-89879.herokuapp.com/*

- A platform for sharing and reviewing music albums.
- Wrote typedefs and resolvers for every model for both the front and the back-end.
- Implemented UI for the profile, home page, collection components, and the singular album page.
- Connected the front-end to the back-end.
- Implemented album caching to the MongoDB database.

Your Portland Itinerary | *github.com/JosephJamesCoop/your-portland-itinerary* **|** *josephjamescoop.github.io/your-portland-itinerary/*

- Itinerary for tourists or tenants of Portland, Oregon.
- Fetch attraction and location data using the OpenWeather API and the TravelAdvisor API.
- Implemented functionality for cards, adding items to the itinerary, the itinerary itself and saving data to localstorage.
- Used Bulma CSS library to style pages and attraction cards.
- Communicated with team members on implementation of itinerary and attraction cards.

Pantry | *github.com/zaclark369/Pantry* **|** *whispering-reef-71968.herokuapp.com/*

- An Expressjs app for finding recipes using ingredients you already have.
- Used Handlebars and Bootstrap for the front-end.
- Used Express-Session and bcrypt to authenticate and identify user sessions allowing for saving favorites.
- Used Sequelize to perform SQL commands and query data.
- Frequently worked with teammates to implement features and solve problems.

TECHNICAL SKILLS

JavaScript, HTML, CSS, Bootstrap, Bulma, OOP, Node.js, Jest, Expressjs, REST APIs, Handlebars, SQL, Sequelize, MVC, NoSQL, Mongoose, React, Apollo Server, Apollo Client, GraphQL, Redux, bcrypt, TDD, Heroku, MySQL2, MySQL, MERN stack.

EXPERIENCE

Doordash, Vancouver, WA - *Driver*

July 2020 - May 2022

Driver for Doordash food delivery service. Obtained and strengthened many soft skills relating to communication and problem solving.

- Frequently updated user on order status or on any issues that arise when going through with the order.
- Communicates with the customer and the merchant to put the issues that arise to rest.
- Strengthened communication and problem solving skills as a result of the last two points.
- Maintained 4.8 Dasher rating, which is determined by customer satisfaction consistently.
